

FABREGAS

Energy: FAO 220

SEEDING
THE FUTURE
SINCE 1856

The early midfielder...
proven in practice!

Characteristics / Quality

- Heavy yield potential (50-55 t/ha)
- Safe maturity for the majority of mainstream sites (27-31% DM)
- Recommended chop length: 7-9 mm
- Recommended seed rate: 42,000 seeds / acre (103,000 seeds / hectare)
- In low rainfall areas: 38,000 seeds / acre (94,000 seeds / hectare)

Data source: KWS Agroservice 2008 – 2011.

“ **FABREGAS** has been the long term standard for AD maize production since its UK introduction.
