

AMBROSINI

Maincrop: FAO 220

SEEDING
THE FUTURE
SINCE 1856

One of KWS' highest yielding silage hybrids

Characteristics / Quality

- 104% DM yield across all NIAB trials
- Good early vigour (7.3) on all sites
- Balanced starch (28.8%) and ME content (11.14 MJ/Kg)

Data source: NIAB Forage Maize Descriptive List. Second choice varieties for favourable sites (2019)

“ AMBROSINI continues to be a true benchmark for all FAO 200-220 maincrop hybrids within the KWS programme.
