

CAMPUS

Oilseed Rape

SEEDING
THE FUTURE
SINCE 1856

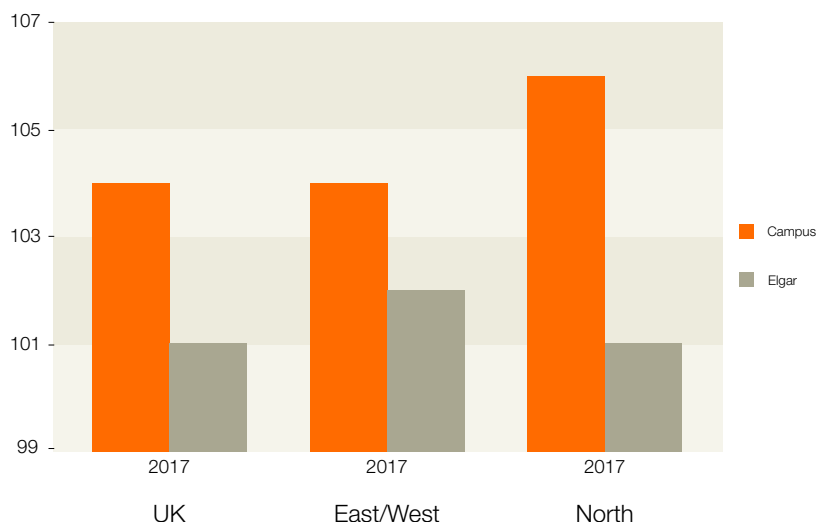

The nation's favourite oilseed rape!

- Reliably high gross output
- Extremely vigorous growth habit
- Twin 8s for lodging and stem stiffness
- Strong tolerance to verticillium wilt

Campus is the most widely sown oilseed rape in the UK. Its popularity owes much to its exceptional autumn and strong spring vigour characteristics, which have proved consistent on-farm performance.

Campus has good disease scores with a 6 for light leaf spot and stem canker, so is suitable for all regions, giving a good level of resistance to both major diseases. Additionally, it performs well in trials where verticillium wilt has been found.

Gross Output (% Controls)

Overview	
Variety Type	Conventional
	UK E/W N
Gross Output	104 104 106
Seed Yield	104 103 105
Agronomy	
Shortness of stem	6
Lodging	8
Stem Stiffness	8
Flowering	6
Maturity	5
Oil Content (%)	45.7
Disease	
Light Leaf Spot	6
Stem Canker	6
Verticillium Wilt Tolerance*	*****
