Hybrid Rye

SEEDING
THE FUTURE
SINCE 1856

New horizons for hybrid rye!

- Multi-purpose hybrid (AD or grain; feed, flour and distilling)
- Excellent stem stiffness and disease resistance
- No.1 harvest index (grains/ear) to drive yield performance and PollenPlus® for low ergot risk

KWS Edmondo offers maximum yield performance for wholecrop or grain, with a leading harvest index (grains/ear). This delivers higher gas output for AD, and top grain yields up to 13t/ha.

End markets for grain include pig finishing diets, whilst outlets for rye flour include baked goods & breakfast cereals, plus growing interest in rye for distilling use.

Ergot resistance is assured using KWS' PollenPlus® technology, coupled with improved brown rust resistance. Hybrid Rye has ultra-low take-all carryover, is aggressive in reducing blackgrass populations, and an ideal addition to all arable rotations.
