

# KWS INSPIRATOR

For those who aim high.

KWS Inspirator	
<b>Grain Yield</b>	
Fungicide-treated (10.2 t/ha)	103
<b>Disease Resistance</b>	
Brown rust (1-9)	[7]
<b>Agronomic Features</b>	
Lodging (%)	[16]
Straw length (cm)	[129]
Ripening (days +/- SU Performer)	0
<b>Grain Quality</b>	
Protein content (%)	8.6
Hagberg Falling Number	265
Specific weight (kg/hl)	75.1

**KWS Inspirator has show good treated yields with an excellent brown rust resistance score.**

### Characteristics/Quality

- High yielding
- Good brown rust score
- High hagberg falling number

KWS Inspirator is a new variety on the 2024/25 Descriptive List. It has shown good treated yields, and has an excellent brown rust resistance score. It is slightly shorter strawed with medium standing power.

KWS Inspirator also has improved resistance to ergot thanks to PollenPLUS technology.

All data taken from **AHDB Winter rye descriptive list 2024/25** unless otherwise stated

# KWS INSPIRATOR yield performance

The graph below is showing KWS Inspirator .vs competitor varieties at Agrii's Aberdeen trial site. KWS Inspirator comes out on top in both treated and untreated yield.

## What can hybrid rye offer growers?

KWS Group is the leading breeder of hybrid rye, with a long term hybrid breeding programme established in the mid-1980s. We offer varieties for wholecrop (as silage, or AD/biogas feedstock) or grain production (for feed grain, flour and distilling). KWS believes this highly productive cereal offers new perspectives for farmers and end-users alike. Thanks to its adaptability, hybrid rye has the potential to slot into most farming rotations.

Advantages of hybrid rye include:

- High yield potential
- Good 2<sup>nd</sup> or 3<sup>rd</sup> cereal option
- Higher straw yields compared to wheat or barley
- 25% lower water requirement than winter wheat
- Less nitrogen inputs
- Extensive rooting system
- Grassweed competition
- Low-risk from take-all and eyespot
- Multiple markets
