

WPB ISABEL

Spring Oat

(LW 03W0383-06 x Husky)

SEEDING
THE FUTURE
SINCE 1856

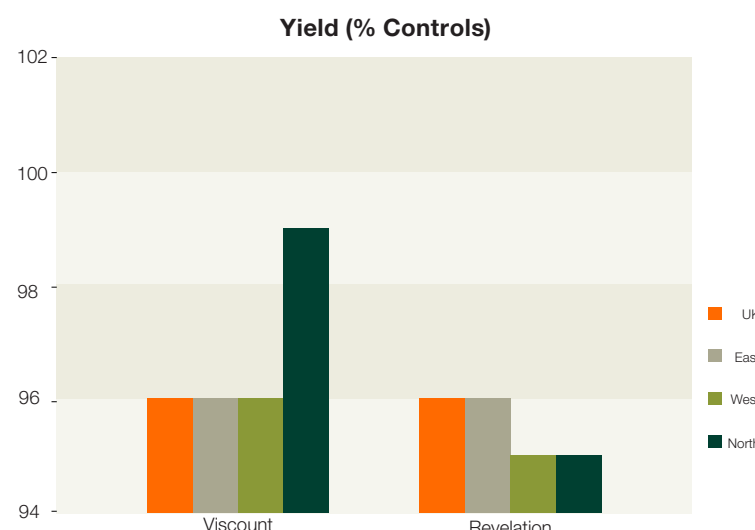

The best combination of yield and specific weight available!

- Highest yielding candidate variety on 2020/21 AHDB Spring Oat List
- Best specific weight of any listed husked Spring Oat
- High kernel content with good screenings

WPB Isabel is the latest addition to the Candidate list of the 2020/21 Spring Oat Recommended List. From the stable that has already delivered WPB Elyann to the market, this Wiersum line will appeal to growers looking for a high yielding spring oat with excellent grain quality.

It has impressive low screenings, a good kernel content and average maturity, similar to that of Firth.

At 114cm it is a taller plant type but has very stiff straw gaining a score of [9] without PGR. Couple this with a good balanced disease resistance and you have a variety that will be liked equally on-farm and in the oat mill.

WPB Isabel	
Yield (% treated controls)	
UK treated	104
UK untreated	89
Disease	
Mildew	6
Crown rust	5
Quality Data	
Kernel content (%)	76.8
Sp.Wt (kg/hl)	55.7
Screenings <2.0mm	2.3
Agronomy	
Lodging (-PGR)	[9]
Height (cm)	[114]
Ripening (days +/- Firth)	0
