

KWS TOWER

Winter Barley

Saffron x Retriever

SEEDING
THE FUTURE
SINCE 1856

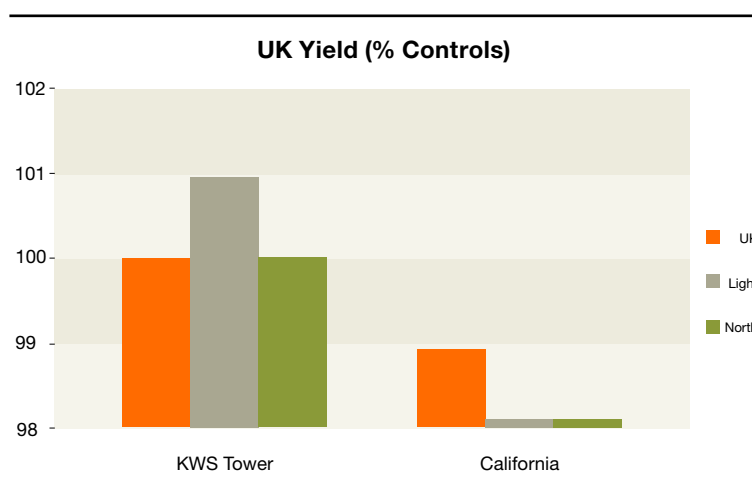

The winter barley that towers above!

- High yielding 2-row
- Consistent on-farm performance for 5 years
- Low screenings, medium height, stiff straw

A Saffron X Retriever cross, KWS Tower combines the bold grain of the former, with the vigour and tillering capacity of the latter. It has medium length straw and is slightly taller than KWS Glacier, but with stronger straw.

This longer straw – a characteristic which tends to impart better drought resistance in barleys – may help explain its strong light land performance.

Drill it in September, allow it to produce a high number of tillers in autumn and it will pile on the yield in the spring.

KWS Tower	
Yield (%)	
UK	100
East	99
West	100
North	100
Disease	
Mildew	5
Yellow Rust	-
Brown Rust	7
Rhynchosporium	5
Net blotch	4
BaYMV	R
Agronomy	
Screenings <2.25mm	2.2
Screenings <2.5mm	7.3
Lodging	8
Maturity (+/- KWS Orwell)	+1
Height (cm) with PGR	88
Sp.Wt (kg/hl)	67.6
