

KWS WILLOW

Spring Wheat

(00-703S X Tybalt) x Belvoir

SEEDING
THE FUTURE
SINCE 1856

High yielding spring wheat

- Highest yielding spring wheat sown in the autumn
- Nabim Group 2 breadmaker
- Best performance when drilled in the late autumn/early spring
- Good disease resistance package, including mildew and yellow rust

KWS Willow offers the best of both worlds in this late drilling slot. It is a variety that consistently delivers a good, bold grain and is overall a very good variety.

It has all round disease resistance - particularly to mildew and yellow rust and matures just behind Cordiale. Like most spring wheats, KWS Willow shows good potential in difficult blackgrass situations.

KWS Willow	
Yield (%)	
UK spring sown	100
UK autumn sown	103
Disease	
Mildew	6
Yellow Rust	6
Brown Rust	5
<i>S.tritici</i>	6
