KWS GIRAFFE

Spring Wheat
KWS Recoletta x KWS Kilburn

- Highest specific weight on the 2022/23 Recommended List
- Excellent grain package with proteins ahead of Mulika
- High yields autumn and spring-sown

Introduced on-farm in spring 2020 is KWS Giraffe – the high yielding UK Flour Millers Group 2 wheat with excellent grain quality.

A truly dynamic wheat, KWS Giraffe yields well in both spring and autumn-sown slots, delivering yields in the spring on a par with market leader KWS Cochise and autumn-sown similar to established Group 4 feed spring types such as KWS Kilburn.

It also boasts one of the best grain packages available in this market sector, with very high proteins similar to Group 1 Mulika (13.5%) and

the best specific weight (79.2 kg/hl) of any spring wheat on the 2023 Recommended List. KWS Giraffe also offers growers security at harvest with short and stiff straw, and early maturity completes its attractive package.

The spring wheat market

Today, on the back of significant plant breeding progression, spring wheat is coming back on the agenda for many UK growers thanks to its rotational benefits. New varieties are robust, flexible and profitable, with yields and physical grain qualities matching many of its late sown winter wheat rivals.

What can KWS offer growers?

KWS UK is one of the few plant breeding companies with a dedicated spring wheat breeding programme to deliver products specifically for the UK farmer. So, if you are looking to spring wheat to serve a quality market, help your rotations, get soils back to better structures, rescue weed burdens or simplify your crop management, then take a closer look at what the KWS spring wheat portfolio can offer.
