KWS FIXUM

Spring Wheat

KWS Cochise x KWS Westfield

- Very high yielding spring feed wheat
- Good all-round disease package
- Consistent over different sites and spring seasons

KWS Fixum is an exceptionally high-yielding spring wheat that resets the yield bar for spring wheats with a yield of 106% of treated control. During its testing over the last very different spring seasons, KWS Fixum has delivered consistently high yields no matter the weather conditions under which it has been grown.

Couple this exciting package with good grain quality, including a strong specific weight (77.6kg/hl) and a good disease profile with [8] for mildew, 7 for brown rust resistance, 6 for yellow rust and [6] for *Septoria*. Add all of that together and you have a really attractive package to

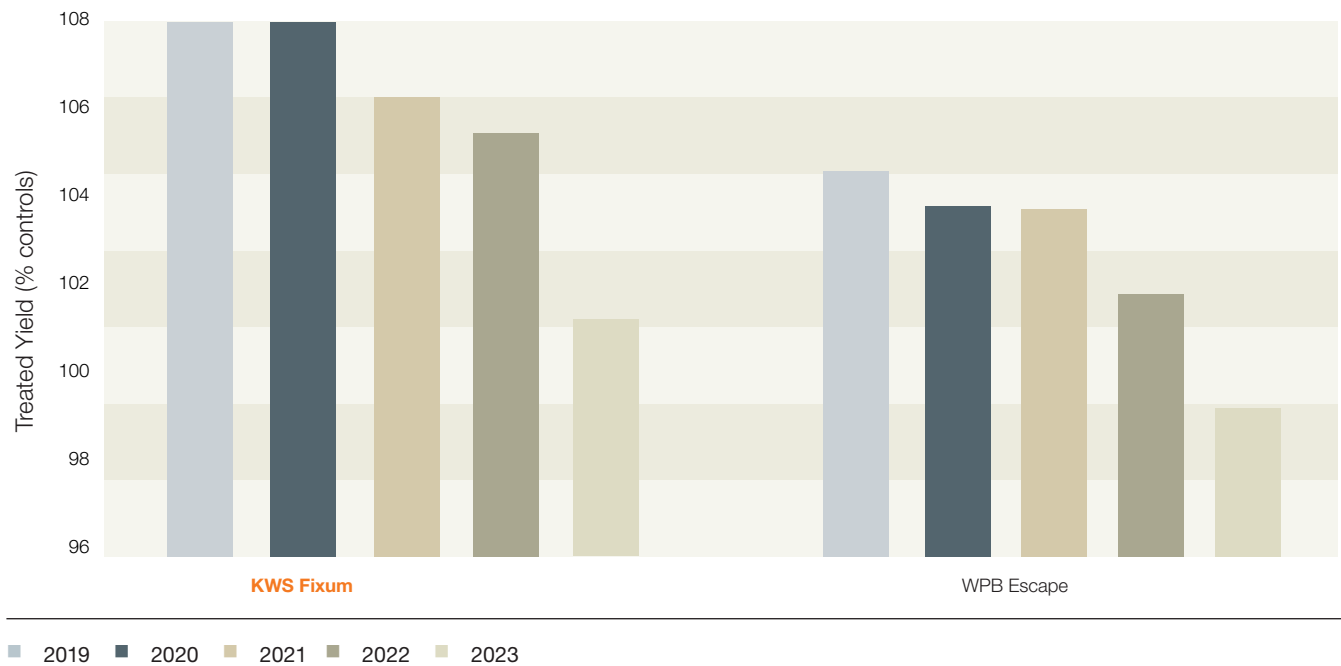

add tonnes of grain to the feed wheat heap.

The spring wheat market

Today, on the back of significant plant breeding progression, spring wheat is coming back on the agenda for many UK growers thanks to its rotational benefits. New varieties are robust, flexible, and profitable, with yields and physical grain qualities matching many of its late sown winter wheat rivals.

What can KWS offer growers?

KWS UK is one of the few plant breeding companies with a dedicated spring wheat breeding programme to deliver products specifically for the UK farmer. So, if you are looking to spring wheat to serve a quality market, help your rotations, get soils back to better structures, rescue weed burdens or simplify your crop management, then take a closer look at what the KWS spring wheat portfolio can offer.
