

KWS GIMLET

Winter Barley

(California x Matros) x KWS Glacier

SEEDING
THE FUTURE
SINCE 1856

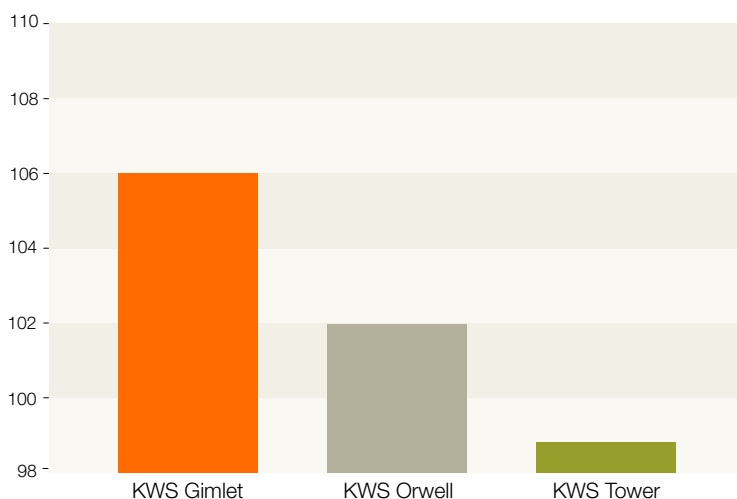

High yielding conventional barley

- Very high yielding 2-row feed in the UK, performing especially well in the East
- Excellent untreated yields
- BaYMV resistant and has no major disease weaknesses

KWS Gimlet is a high-yielding two-row feed that will appeal strongly to those in the east where it has delivered its best performances and, at 106% of controls, is one of the highest-yielding two-row varieties available. It has good resistance to both *Rhynchosporium* and net blotch with scores of 6 for both. It is resistant to Barley Yellow Mosaic Virus (BYMV).

At about 92cm, (with PGR) KWS Gimlet is taller than its parents, while being earlier to mature than KWS Glacier and is higher yielding than KWS Orwell. Straw strength is good though experience suggests the use of a structured programme PGR is advised.

Eastern Yield (% Controls)

KWS Gimlet	
Yield (% treated controls)	
UK	103
East	106
Untreated	83
Disease	
Mildew	6
Yellow Rust	-
Brown Rust	6
<i>Rhynchosporium</i>	6
Net blotch	6
BaYMV	R
Agronomy	
Resistance to lodging	7
Maturity (+/- KWS Orwell)	0
Height (cm) with PGR	92
Sp.Wt (kg/hl)	68.3
