

KWS HAWKING

2 Row Feed Winter Barley
(11-12 x California) x KWS Tower

SEEDING
THE FUTURE
SINCE 1856

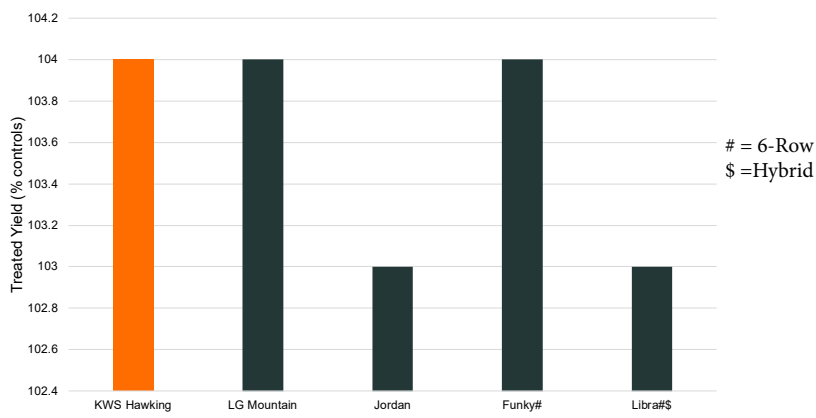

The next step in winter barley headline yield

- The UK's highest yielding 2-row winter barley, performing especially well in the AHDB East and West
- Early to mature
- Excellent grain quality

KWS Hawking is the next variety from the KWS UK winter barley programme whose exceptional yields will appeal to growers in the East and West of the country where, in KWS trials, it has recorded its best performances to date.

It is the ideal barley for those looking for top performance from a conventional 2 row feed type; in AHDB Harvest 2019 candidate trials, KWS Hawking out-performed all controls including the six-row type, Funky and the hybrid Bazooka.

KWS Hawking boasts a strong set of agronomic features, with no disease weaknesses and resistance to BaYMV. In addition, it is a mid-length strawed type which has good resistance to lodging. An added benefit is that KWS Hawking is an earlier maturing type. In our own KWS UK trials for the past 2 seasons, the variety is significantly ahead its stablemates in reaching ear emergence in May.

KWS Hawking	
Yield (% treated controls)	
UK treated yield	104
East	106
UK untreated yield	83
Disease	
Mildew	5
Yellow rust	-
Brown rust	6
Rhynchosporium	6
Net blotch	6
BaYMV	R
Agronomy & Quality	
Lodging	7
Height (cm) with PGR	84
Maturity (+/- KWS Orwell)	0
Sp.Wt (kg/hl)	68.5
