

# KWS HENUM

## KWS W389

Winter Wheat

KWS Kerrin x Hardwicke

SEEDING  
THE FUTURE  
SINCE 1856

## The new *Septoria* resistant star

- The best *Septoria* rating in NL2 trials (7.8)
- Excellent untreated and western yield performance
- Slow developing type with potential for good early drilling performance

KWS Henum earns its place on the RL candidate list thanks to its very high *Septoria* resistance. Scoring the highest in NL2 (7.8) the variety has also proved itself across Europe showing better resistance in the field trials than KWS Extase in Denmark.

KWS Henum could be the ideal partner to those looking for an early driller before heading into KWS Extase. Henum produces a uniform plant type - akin to KWS Lili before it with good stiff straw. It also helps spread the workload at harvest being later to mature (+3).

KWS Henum	
Yield (% treated controls)	
UK treated	102
UK untreated	81
East	102
West	[104]
Disease	
Mildew	8
Yellow rust	9
Brown rust	7
<i>S.tritici</i>	7.8
