

KWS PALLADIUM

Winter Wheat

KWS Zyatt x KWS Trinity

SEEDING
THE FUTURE
SINCE 1856

Super clean breadmaker with harvest security built-in

- Potential nabim Group 2 with good grain
- Excellent disease resistance, with a *Septoria* score of 7.3 and high untreated yield
- Consistent performer across contrasting seasons

KWS Palladium is an excellent potential Group 2 winter wheat for both domestic and export markets. It has great commercial potential with good loaf volumes akin to Skyfall and KWS Siskin. This new variety is a remarkably clean breadmaker with its agronomics achieving a great *Septoria* score (7.3) along with mildew (8) and yellow rust (9).

This early to mature, short and very stiff variety gives harvest security and has proven to be a good yield performer across all regions. Suited to earlier drilling, KWS Palladium will be a good partner on-farm to KWS Extase helping scheduling workloads through out the season and into harvest.

	KWS Palladium	KWS Siskin
Yield (% treated controls)		
UK treated	101	99
UK untreated	85	80
East	101	101
West	[101]	[100]
North	[[102]]	[[98]]
