

Your soft wheat choice for the north!

KWS FLUTE

Group 3 Winter Wheat
(Shabras x Elicit)

- Excellent early sown performance, making it ideal for northern growers
- Excellent second wheat potential with high specific weight
- Harnesses all soft markets – Group 3, UKS, distilling and feed

KWS Flute is an ideal early sown specialist from KWS for growers looking to harness soft wheat contracts at harvest 2026.

KWS Flute brings all the resilient characteristics needed for northern growers looking to harness soft contracts in their regions – be it biscuit, distilling, export as UKS or feed. The variety has a good all-round disease resistance for this challenging region.

Couple these characteristics with good specific weight (78.0kg/hl) and later maturity (+1 days compared with Skyfall) and you have a resilient plant type which is ideal for growers both in the first and second wheat slots.

OWBM resistance and yield consistency over contrasting season complete this attractive package.

**KWS Flute – music to the ears
of soft wheat growers!**

RECOMMENDED

What makes KWS FLUTE the wheat variety for you?

KWS Flute brings early sown potential for soft wheat growers.

KWS FLUTE yield performance

Yield	% treated controls

KWS FLUTE - Sowing for Peak Performance

80% of your crop’s potential is locked in by the seed you buy and sow. While you can fine tune this with the correct nitrogen levels, using fungicides wisely to protect it from disease and paying attention to basic management principles, many attributes of your crop can’t be changed. Therefore, it pays for you and your agronomist to make proactive choices before ordering a variety.

To get peak performance from KWS Flute we recommend drilling in the following time window:

At KWS, we believe to get the best performance on your farm it is critical that when you choose your variety, you are using a wealth of data to tailor your choice for both your farm and individual field situation.
