

# Your soft wheat choice for the north!

## KWS FLUTE

Group 3 Winter Wheat  
(Shabras x Elicit)

- Excellent early sown performance, making it ideal for northern growers
- Inherently high specific weight and earlier to mature than any
- Harnesses all soft markets – Biscuit, UKS, distilling and feed

KWS Flute is an ideal early sown specialist from KWS for growers looking to harness soft wheat contracts at harvest 2026.

KWS Flute brings all the resilient characteristics needed for northern growers looking to harness soft contracts in their regions – be it biscuit, distilling, export as UKS or feed. The variety has a good all-round disease resistance for this challenging region.

Couple these characteristics with good specific weight (78.0kg/hl) and relatively early maturity for the soft market, and you have a resilient plant type which is ideal for growers both in the first and second wheat slots.

OWBM resistance and yield consistency over contrasting season complete this attractive package.

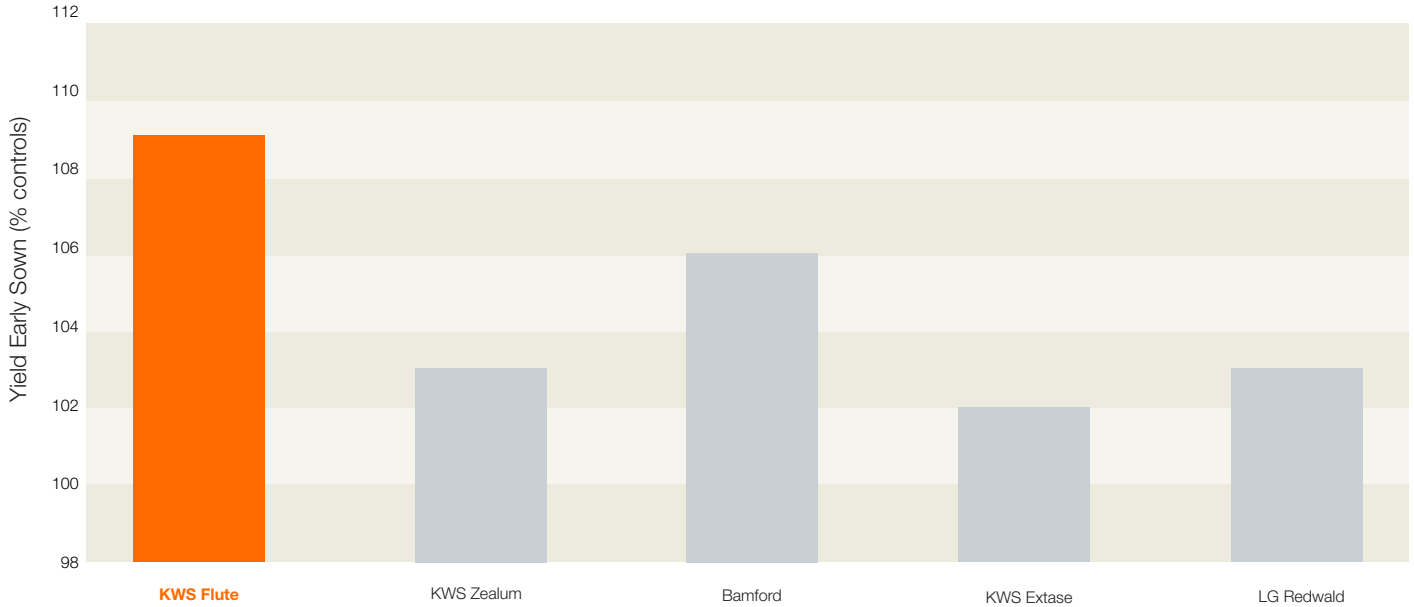

**KWS Flute – music to the ears of soft wheat growers!**

RECOMMENDED

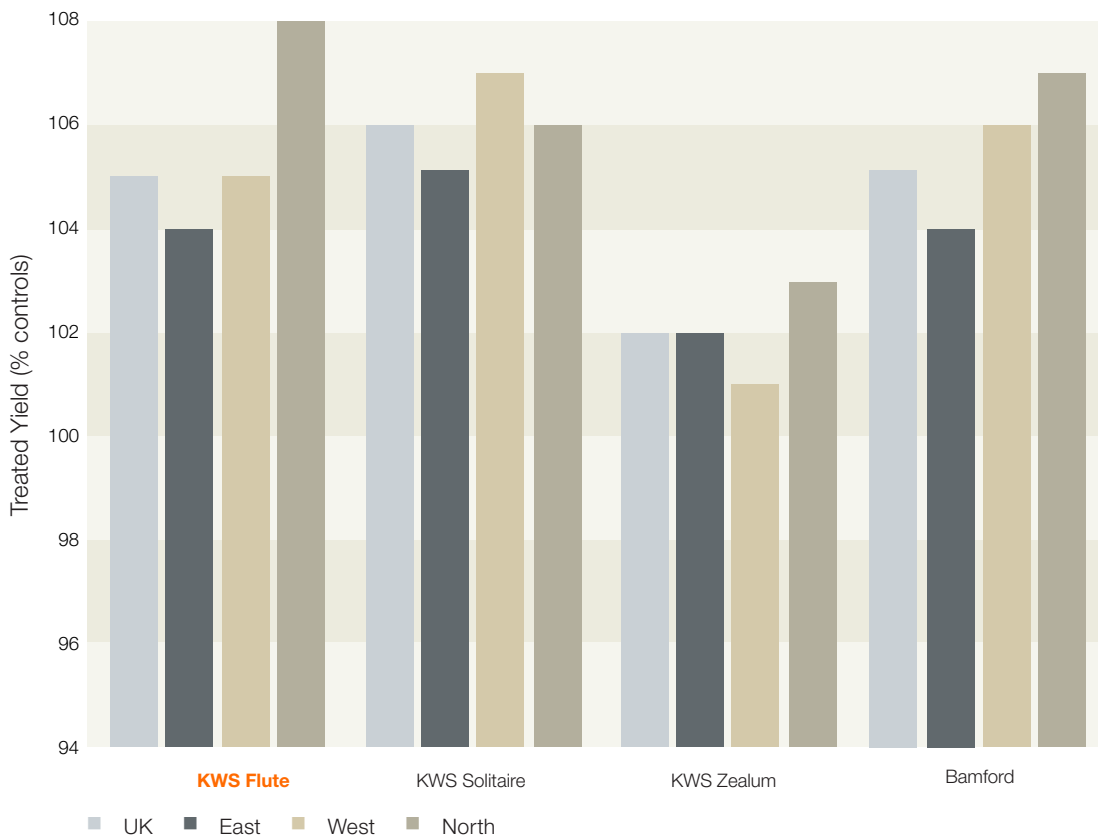

# What makes KWS FLUTE the wheat variety for you?

KWS Flute is the only soft variety to perform at above 107% controls in both Northern and early sown trials series.

## KWS FLUTE yield performance

KWS Flute has exceptional yield in the Northern region.

Yield	% treated controls
UK	105
East	104
West	105
North	108
Untreated	81
2022	106
2023	105
2024	108
2025	105

# Disease resistance and agronomy of KWS FLUTE

## KWS FLUTE end markets

KWS Flute gives growers marketing flexibility with its suitability for biscuit, export, distilling and feed markets.

Protein content (%) Milling spec	12.1
Hagberg Falling Number	217
Specific Weight (kg/hl)	78.0

# KWS FLUTE - Sowing for Peak Performance

**80% of your crop's potential is locked in by the seed you buy and sow.** While you can fine tune this with the correct nitrogen levels, using fungicides wisely to protect it from disease and paying attention to basic management principles, many attributes of your crop can't be changed. Therefore, it pays for you and your agronomist to make proactive choices before ordering a variety.

**To get peak performance from KWS Flute we recommend drilling in the following time window:**

At KWS, we believe to get the best performance on your farm it is critical that when you choose your variety, you are using a wealth of data to tailor your choice for both your farm and individual field situation.
