

KWS ARTIKUS

Ultra Early: FAO 160

SEEDING
THE FUTURE
SINCE 1856

Ultra early yields...rocket fuel silage!

Characteristics / Quality

- Top DM yield in its class – across all NIAB trials
 - 2018: Average 17.7 t/ha DM
 - 2021 DL: 17.9 t/ha DM
- Rapid early vigour (2017: 6.0 – 8.7), 2021 DL (7.4)
- Very high starch (2017: 37.8 – 41.3%), 2021 DL (35.4%)
- Excellent ME content
 - 2017: 11.90 MJ/Kg
 - 2021 DL: 11.88 MJ/Kg
- Full cob sheath coverage
- Superb kernel content and ripening stability

Data source(s): KWS LP250 (2016 + 2017) & FERA NL Trials for Forage Maize
– All sites (2017 + 2018).

NIAB Forage Maize Descriptive List. First choice varieties for favourable sites (2021).

“ **KWS ARTIKUS** continues to push UK maize performance higher – with superb energy – dense silage quality, driven by its high kernel content.

Ideal for securing an early harvest regardless of drilling date.
