

AMAROC

Energy: FAO 240

SEEDING
THE FUTURE
SINCE 1856

Heavy yield potential

Characteristics / Quality

- Heavy yield potential (55 – 60 t/ha)
- Ideal for spreading harvest or drilling window on lighter land
- Rapid early vigour
- Recommended chop length: 7 – 9 mm
- Recommended seed rate: 42,000 seeds / acre (103,000 seeds / hectare)
- In low rainfall areas: 38,000 seeds / acre (94,000 seeds / hectare)

Data source: KWS Agroservice 2015 – 2016.

AMAROC offers excellent DM yield for AD feedstock production on favourable sites and in high heat unit areas.
