

KWS KAMPINOS

Maincrop: FAO 200/210

NEW

SEEDING
THE FUTURE
SINCE 1856

Continental yields with cold tolerance ...silage or AD use!

Characteristics / Quality

- Heavy yield potential (50 – 55 t/ha)
- Ideal hybrid for spreading drilling windows
- High grain:stover ratio for stable ripening
- Approx. 3 – 4 days later maturity to FABREGAS*
- Recommended seed rate: 42,000 seeds / acre (103,000 seeds / hectare)
- In low rainfall areas: 38,000 seeds / acre (94,000 seeds / hectare)

Data source: *KWS Agroservice 2019 – 2020

Hybrid subject to a Pre NL Marketing Agreement

Initial seed availability is limited

KWS KAMPINOS adds more options for AD or silage growers looking for a wider drilling window, without losing yield potential in dry spring conditions.
