

CAMPUS

Oilseed Rape

SEEDING
THE FUTURE
SINCE 1856

The seed with speed!

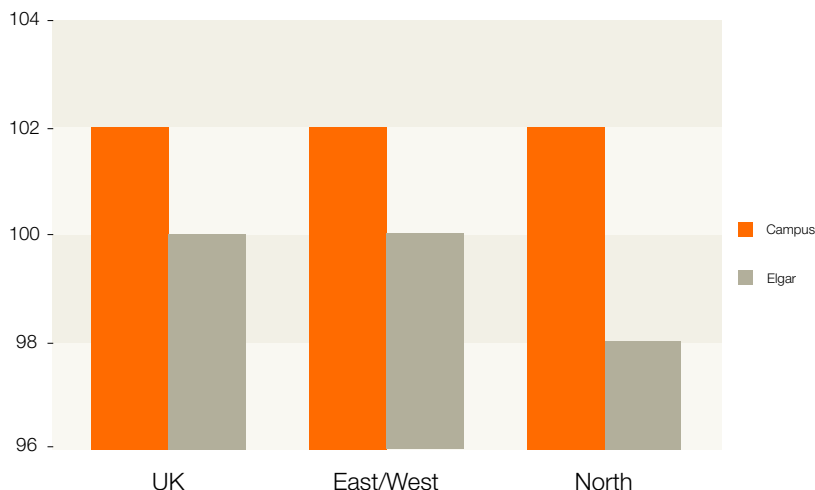

- Extremely vigorous growth habit
- Reliably high gross output with good lodging resistance and stem stiffness
- Gold standard tolerance to verticillium stem stripe

300,000 hectares of growers can't be wrong! Campus is one of the most widely sown oilseed rape varieties in the UK. Its popularity owes much to its exceptional autumn and strong spring vigour, which have delivered consistent on-farm performance.

Campus has good disease scores with a 6 for light leaf spot and stem canker, so is suitable for all regions, giving a good level of resistance to both major diseases. Additionally, it performs well in trials where verticillium stem stripe has been found.

It's faster than the flea beetle and always delivers more than it says on the tin!

Gross Output (% Controls)

Campus			
Overview			
Variety type	Conventional		
	UK	E/W	N
Gross output	102	102	102
Seed yield	102	101	102
Agronomy			
Shortness of stem	6		
Lodging	8		
Stem stiffness	7		
Flowering	6		
Maturity	5		
Oil content (%)	45.4		
Disease			
Light leaf spot	6		
Stem canker	6		
Verticillium stem stripe tolerance*	*****
