

BLAZEN

Oilseed Rape

SEEDING
THE FUTURE
SINCE 1856

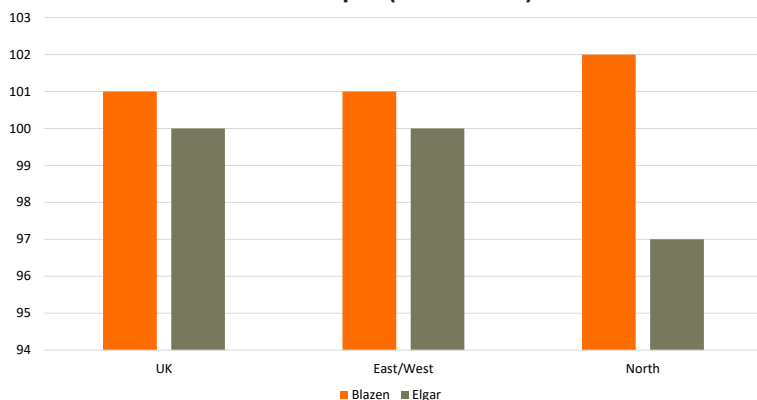

High yielding conventional variety

- Marketed under the Oilseed Establishment Partnership (OEP)
- Good resistance to lodging with stiff straw
- Relatively late flowering with medium maturity

Blazen is a high yielding conventional variety recommended for the north but suitable for all the main OSR growing areas of the UK. It is a Picto cross and has good resistance to lodging. Blazen is marketed under the KWS OEP scheme.

It has a very good multigene resistance to stem canker. Blazen is a short and stiff variety with good performance across the main OSR regions of England and has had excellent performance in KWS UK trials.

Gross Output (% Controls)

Blazen	
Overview	
Variety Type	Conventional
Recommendation	North
Gross Output UK	101
Gross Output East/West	101
Gross Output North	102
Agronomy	
Shortness of stem	6
Resistance to lodging	[8]
Stem Stiffness	9
Earliness of flowering	6
Earliness of maturity	5
Oil Content (%)	44.7
Disease	
Light Leaf Spot	6
Stem Canker	6

The Oilseed Establishment Partnership

The KWS OEP offers a practical solution to growers with concerns around the establishment of oilseed rape crops. The OEP shares the risk of establishment between the grower, merchant and breeder. The initial seed cost is lower for the grower, allowing better cashflow and the opportunity for flexible seed rates.

For more information on the KWS OEP, please visit our website.
