Oilseed Rape

Hybrid

SEEDING
THE FUTURE
SINCE 1856

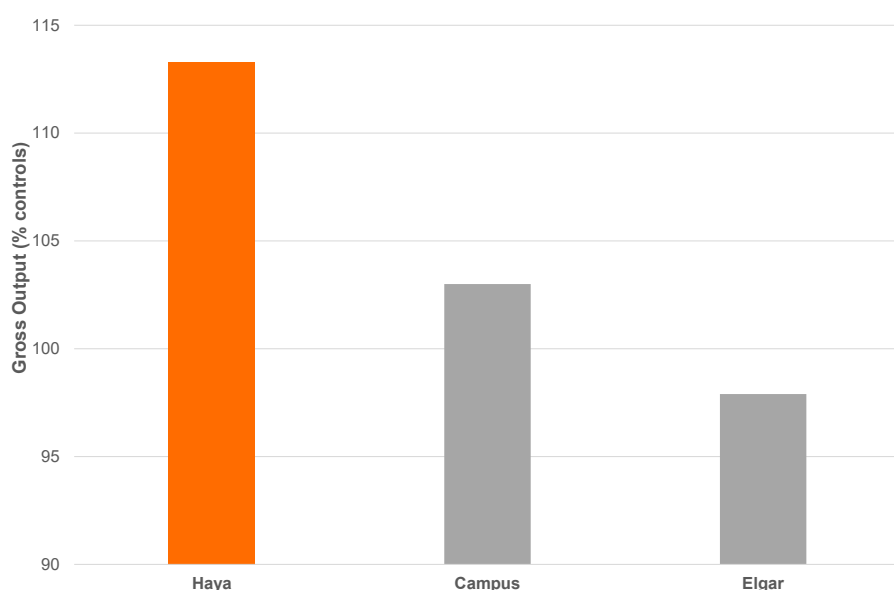

New Hybrid with a complete package!

- High yielding
- Strong stem stiffness
- Excellent disease package

Haya is a high yielding addition to KWS's portfolio, showing great performance especially in the East/West.

Providing farmers with a good agronomic package, Haya has very stiff straw and excellent resistance to lodging. Also, medium flowering with medium maturity can be expected from this exciting new variety.

Haya has a solid disease resistance package with good resistance to light leaf spot (5) and excellent resistance to stem canker (9).

Haya		
Overview		
Variety type	Hybrid	
	UK	E/W
Gross output	105	113
