KWS GRANOS

Oilseed Rape
Variety Type: Hybrid

- High gross output
- Vigorous autumn growth
- Good resistance to light leaf spot and TuYV

KWS Granos is one of a new generation of hybrids from KWS which include the 'bolt on' traits that the innovative farmer expects.

KWS Granos is a very high gross output variety with an oil content of 45.5%. It has a very vigorous autumn growth and excellent standing. It has medium flowering and maturity and has the pod shatter gene.

In terms of disease resistance KWS Granos has a strong package with good resistance to light leaf spot (7) and tolerance to TuYV. Trials have shown KWS Granos has outstanding tolerance to Verticillium Stem Stripe, performing better than all the current standards. Stem Canker resistance is medium rated at a 5.

Why you should grow KWS GRANOS

Verticillium stem stripe can be a yield robber in oilseed rape. KWS Granos performed particularly well in the inoculated pot test carried out by ADAS for KWS UK Ltd.
