

Investor presentation

KWS SAAT SE & Co. KGaA | February 2024

SEEDING
THE FUTURE
SINCE 1856

**WHY INVEST IN
KWS?**

We are an
innovation-driven
company turning
sustainability in
agriculture into
growth

Sustainability
is anchored in our
company values

We are **independent**
and **family-backed**
company with a track
record of growth by
providing **innovative**
solutions for farmers

As one of **the**
leading plant
breeding companies
worldwide we strive
for **further**
profitable growth

KWS at a glance

KWS ranks among the world`s leading companies for plant breeding

253

Sugarbeet

Feedbeet

Overview

- Leading position globally with >60% market share
- Growth driver: innovative product portfolio & pipeline, addressing needs of sugarbeet growers
- Example: New CR+ varieties offer a high level of tolerance against leaf disease cercospora, thus reducing fungicide use
- Seasonality: mainly Q3

Sales by region*

*Financial year 2022/2023

The new and powerful
**Cercospora variety
generation (CR+)**
offers a novel **disease
suppression** and
yield performance

EBIT*
in € million

40

Rye

Rapeseed

Wheat

Barley

Sorghum

...

Overview

- Broad portfolio of cereal crops
- #1 in hybrid rye, leading position in rapeseed
- Strong R&D pipeline including hybrid wheat
- Growth driver: hybrid rye, regional expansion
- Seasonality: mainly H1

Sales by region*

NORTH & SOUTH
AMERICA
8%

EUROPE
(w/o GER.)
60%

GERMANY
32%

*Financial year 2022/2023

Hybrid rye has the
lowest CO₂ footprint
of all cereals.

It requires far **less**
water, agrochemicals
and fertilizers.

Previous year's figures in brackets

Opportunities

- Price development for agricultural commodities
- Expansion of cultivated areas in anticipation of falling availability of agricultural products
- Broad KWS product portfolio enables market fluctuations to be balanced out

Risks

- Persistent inflationary pressures
- Influence of weather extremes on quantity and quality in seed multiplication
- Geopolitical risks, esp. Ukraine war

Forecast for FY 2023/2024

- Further growth expected in a challenging environment
- Sales increase of 3 – 5% (on a comparable basis)
- Stable EBIT margin at 11 – 13%
- Continued high investments in R&D (18 – 19% of sales)

**TURNING

features

Contribution of plant breeding: Product Impact

Safeguard food production

- 1.5 % annual yield gain for farmers through progress in plant breeding and
- Digital farming solutions on >6 million hectares

Minimize input required

- Invest >30 % p.a. of R&D budget into reduction of inputs
- >25% of KWS varieties are suitable for low input

Enhance crop diversity

- Increase number of crops with dedicated breeding programs from 24 to 27

Support sustainable diets

- >40 % of KWS varieties are suitable for predominantly direct use in human nutrition

Corporate Responsibility

Improve operational footprint

- Reduce scope 1 & 2 emissions by 50 % until 2030 and to net-zero by 2050
- Establish score cards

Foster social engagement

- Min. 1 % EBIT p.a. into social projects
- Improve employee engagement
- Declining trend of accidents/illnesses index

In alignment with global megatrends...

Climate change

Call for sustainable agriculture and supply chains

Climate change impacts cultivation conditions

Cost pressure in agricultural raw material production

Consumer demands

Growing demand for plant-based alternatives to animal protein

Desire for healthy lifestyle and diets

Digitalization

Automation and digitalization in the field of agriculture

Evolution of direct and digital sales channels

Sustainable Agricultural Practices – Our approach

**Low input
varieties**

A photograph showing a dense field of green plants, likely a cover crop or a low-input variety, with the text 'Low input varieties' overlaid in white.

**Stress
resistant
varieties**

A photograph of a small green plant growing in a clear plastic container filled with water, with the text 'Stress resistant varieties' overlaid in white.

**Organic
seeds**

A photograph of a field of white flowers, likely rapeseed, with the text 'Organic seeds' overlaid in white.

**Animal
feeding**

A close-up photograph of a cow's head, showing its eye and ear, with the text 'Animal feeding' overlaid in white.

**Weed
control
methods**

A photograph of a tractor plowing a field, with the text 'Weed control methods' overlaid in white.

**Mixed
cropping
systems**

A photograph of a field with different colored crops (yellow, green, and brown) planted in rows, with the text 'Mixed cropping systems' overlaid in white.

Examples for our contribution to a more sustainable agriculture

Low Input Varieties

- **Stable yields** with low fertilizer input, limited water availability or reduced use of chemical plant protection products
- KWS develops cross-crop varieties for global markets
- Goal by 2030: More than 30 percent of the annual R&D budget in low input varieties

First sunflower varieties

- **Expansion of the portfolio** and start of breeding programs for sunflowers in 2010
- Against the background of climatic challenges, it is playing an increasingly important role in **crop rotation**, especially in Southeast and Eastern Europe
- In 2023, the first varieties from our own breeding program were submitted for approval in several countries

“Beat the heat“ Beans

- **Heat periods** cause regional problems when growing bush beans
- Within around 15 years we have bred heat-tolerant bean varieties
- These are successfully sold in the USA under the brand “**Magma Collection – beat the heat**”. Further potential for Italy and northwest Europe.

Nutritional Food Ingredients – sustainable, valuable sources of protein

A

Strengthening the portfolio of crops, varieties and traits in the field of alternative protein products

KWS will follow two promising approaches

B

Partnering with companies in the food industry; improvement of characteristics such as flavor, texture or emulsification

Connected Seeds - Expanding our growing digital platform „myKWS“

Continuous expansion of the **service area**

Expansion of **services and functions**

Today (among other things)

- Crop rotation planning
- Sowing optimization
- Inventory management tools
- Satellite-based damage analysis

Future Sales Models – Customer centricity

Digital Farming

CRM Systems

Seed Wholesaler

Consulting

Webshops

Future value creation through innovative seeds

Digital Services

Less Inputs

Income opportunity GHG reduction

Higher yield

New Crops with high value creation

Leveraging crop synergies

Access to state of the art, tailored expertise

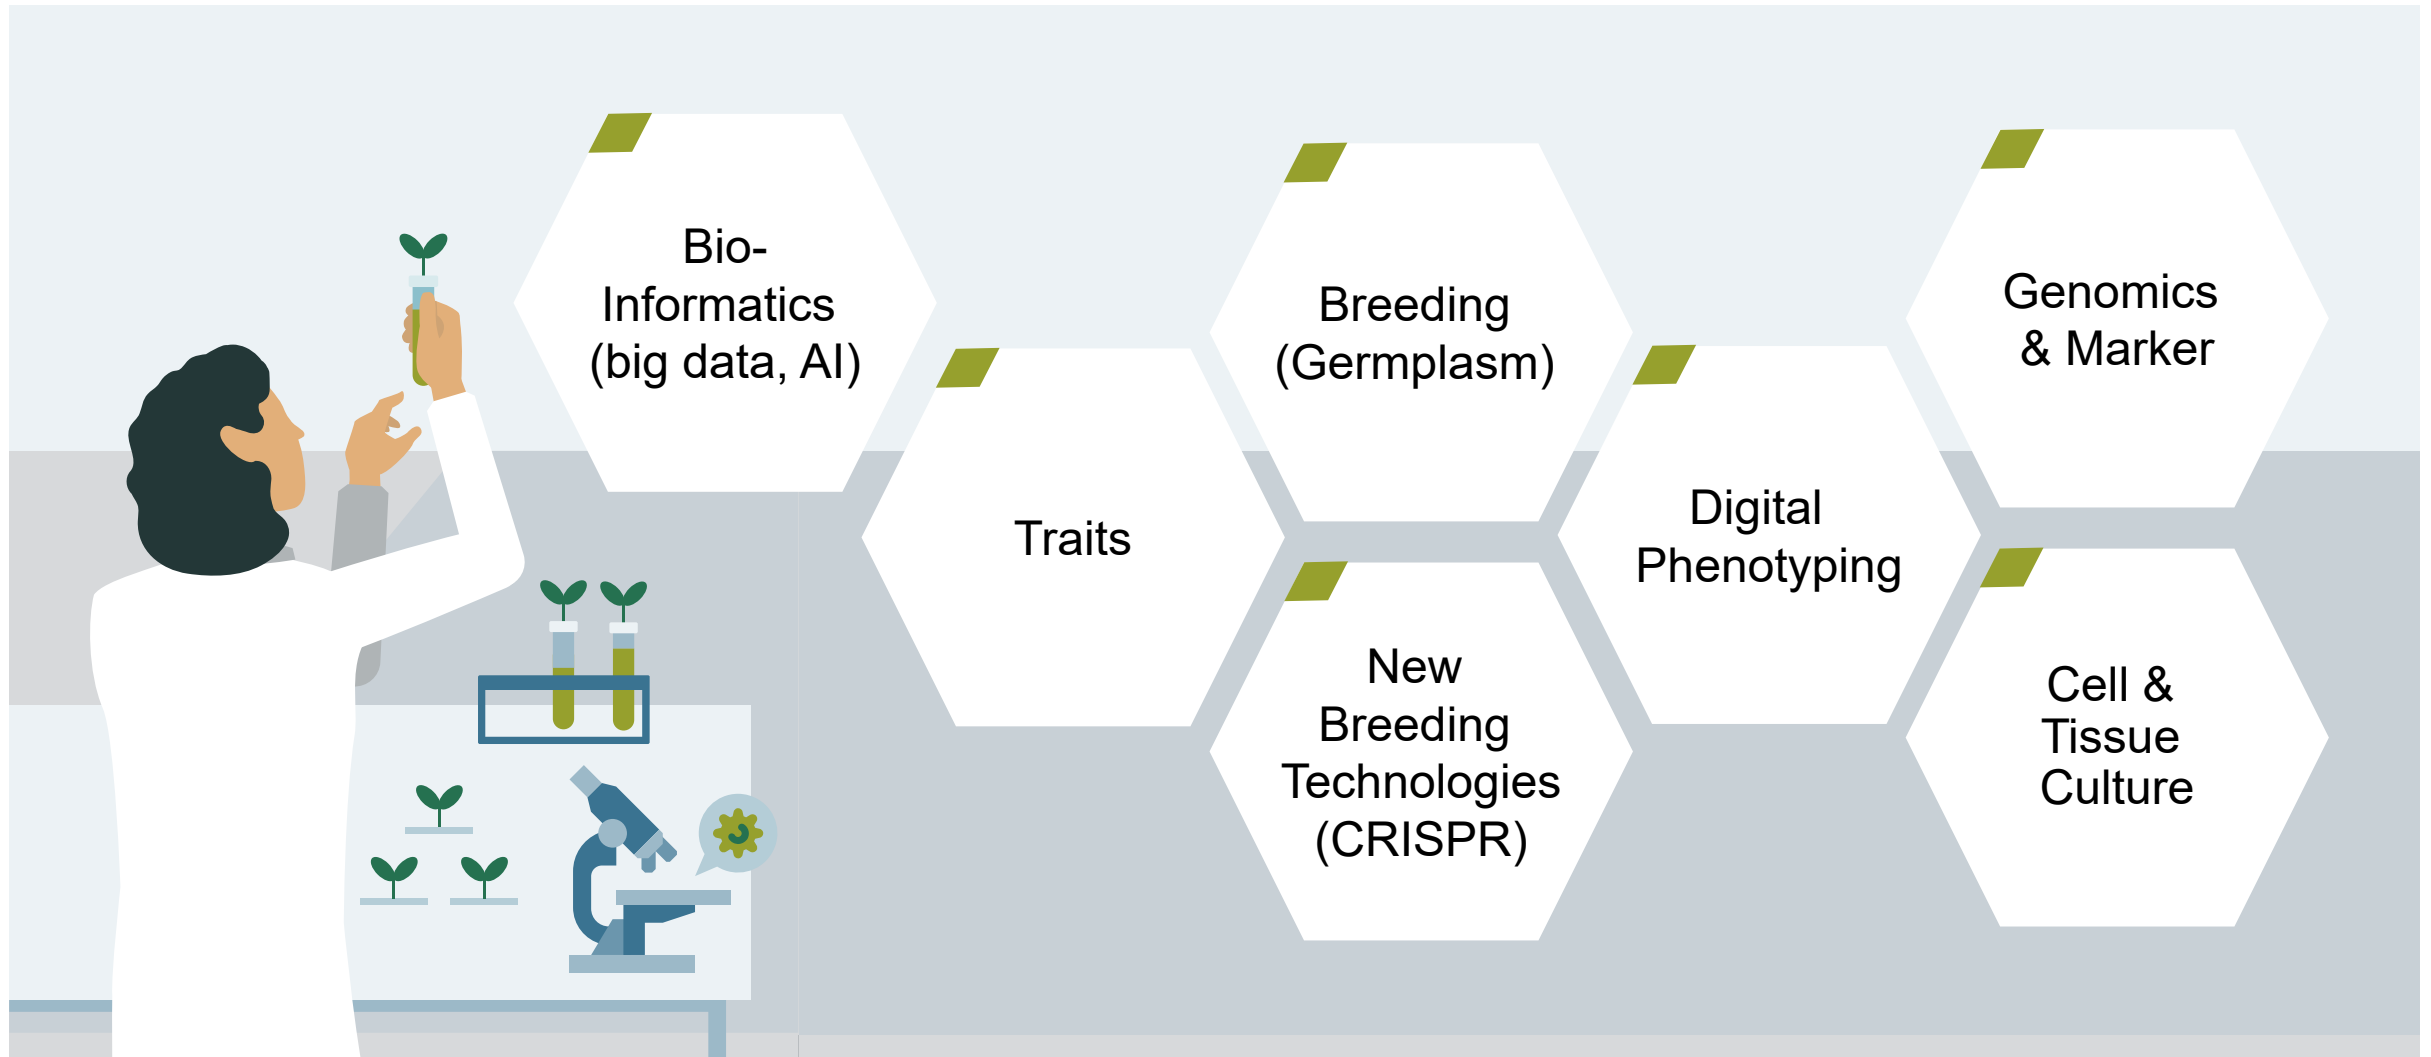

**INNOVATION IS
KEY TO SUCCESS**

We develop plants
that **support a**
sustainable
agriculture.

Technologies will
make this **faster and**
more targeted.

Technology is the backbone of our success
