## myKWS online agricultural forums

**KWS agricultural forums offer farmers the opportunity to obtain information about topics relating to crop production, farming management and animal husbandry. Due to the coronavirus situation, KWS is offering the forums online as live events in December this year.**

“Lasting about 90 minutes each, the events will highlight topics such as crop production, cattle and pig farming, biogas, and organic farming, with the focus in each case on rapeseed, corn, cereals, sugarbeets and cover crops,” says Philip Jung, who heads marketing for KWS’s corn unit in Germany. KWS has already had very positive experiences with the new concept of presenting activities as Teams live events while holding various field days online. As was done in recent years at the standard agricultural forums, KWS experts will discuss practice-oriented topics while speakers from the agricultural industry and the business community will make brief presentations. Participants will also have an opportunity to ask questions through the chat function. “Our agricultural forums have always included lively discussions and exchanges, so we’ve allocated extra time for the chats.” Jung says. Separately registering for each date is not necessary. In advance of the forums, KWS will provide a link on the landing page [www.kws.de/agrarforen](http://www.kws.de/agrarforen) where everyone who is interested can dial into the event.

### **Dates:**

Crop production: Tuesday, December 8, 2020, 10 a.m. to 11:30 a.m.

Biogas: Wednesday, December 9, 2020, 10 a.m. to 11:30 a.m.

Organic farming: Thursday, December 17, 2020, 10 a.m. to 11:30 a.m.

### **About KWS\***

KWS is one of the world's leading plant breeding companies. In the fiscal year 2019/2020, more than 5,700 employees in 70 countries generated net sales of EUR 1.3 billion. A company with a tradition of family ownership, KWS has operated independently for more than 160 years. It focuses on plant breeding and the production and sale of seed for corn, sugarbeet, cereals, rapeseed, sunflowers and vegetables. KWS uses leading-edge plant breeding methods to increase farmers' yields and to improve resistance to diseases, pests and abiotic stress. To that end, the company invested more than EUR 200 million last fiscal year in research and development.

\*All indications excluding the results from the companies accounted for using the equity method AGRELIANT GENETICS LLC, AGRELIANT GENETICS INC. and KENFENG – KWS SEEDS CO., LTD.
